

Looking for a suitable Cryostat ?

top-loading cryogen-free and Helium based systems with fast turn-around times | PPMS compatible

The attoDRY1100 is the perfect cryogen-free cooling platform for high resolution scanning probe experiments.

KEY FEATURES OF THE ATTODRY1100

- + ultra low vibrations
- + no liquid He needed
- + 9 T superconducting magnet (standard), vector and others magnets available on request
- + top loading design
- + cooldown time from 300 to 4 K : ~ 5 h
- + **NEW**: fully automated, turnkey operation

The highly efficient attoLIQUID1000 can be the cryostat of choice for facilities with access to liquid Helium.

Also available for the PPMS system from Quantum Design and 1" clear bore size cryostats.
